The total payment will be calculated using the sum of the producer’s number of livestock sold between January 15 and April 15, 2020, multiplied by the payment rates per head, and the highest inventory number of livestock between April 16 and May 14, 2020, multiplied by the payment rate per head.</p> <p><b>Dairy:</b> For <b>dairy</b>, the total payment will be calculated based on a producer’s certification of milk production for the first quarter of calendar year 2020 multiplied by a national price decline during the same quarter. The second part of the payment is based a national adjustment to each producer’s production in the first quarter.</p> <p><b>Specialty Crops:</b> For eligible specialty crops, the total payment will be based on the volume of production sold between January 15 and April 15, 2020; the volume of production shipped, but unpaid; and the number of acres for which harvested production did not leave the farm or mature product destroyed or not harvested during that same time period, and which have not and will not be sold.
